EXECUTIVE SUMMARY

Motivated and detail-oriented software engineering graduate with a strong foundation in object-oriented programming, database management, and secure software development. Seeking an entry-level position to apply technical skills, logical reasoning, and UI design knowledge in a collaborative development environment.

HIGHLIGHTS OF QUALIFICATIONS

- Strong foundational knowledge in software development, including object-oriented programming, database design, and software engineering principles.
- Skilled in Java, Python, C++, and SQL, with hands-on experience in web development using HTML, CSS, and JavaScript.
- Proficient in using development tools such as Visual Studio, Eclipse, NetBeans, and version control systems like Git/GitHub.
- Solid understanding of computer operating systems, networking fundamentals, and application security practices.
- Developed multiple academic projects, including a student management system and an e-commerce user interface, demonstrating full software development lifecycle (SDLC) knowledge.
- Strong analytical and problem-solving skills gained through coursework in Mathematics and Logic for Computing.
- Effective team player with excellent communication skills, enhanced by training in Communication for Technicians and collaborative class projects.
- Committed to continuous learning, professional growth, and applying technology to solve real-world challenges.

EDUCATION

Advanced Diploma in Software Engineering   **January 2025 to Present**
Centennial College

Diploma in Software Engineering   **August 2022 to May 2024**
University of Trinidad and Tobago

SKILLS/TRAINING

- Programming Languages: Java, C++, Python, SQL, JavaScript
- Web Development: HTML, CSS, basic knowledge of frontend frameworks
- Database Technologies: MySQL, SQL Server, database optimization
- Software Development: Object-Oriented Programming, Agile Methodology, SDLC
- Tools & Platforms: Git/GitHub, Visual Studio, Eclipse, NetBeans

Projects

- Student Information System (Capstone Project)
- Designed and implemented a database-driven student management system. Developed using Java and MySQL with a focus on secure login and data handling.
- Online Storefront Interface
- Created a responsive user interface using HTML/CSS and basic JavaScript. Integrated product database and shopping cart functionality.
